## POPULAR OPTIONS

For any option it is recommended to consult Vishay Sfernice for availability first.

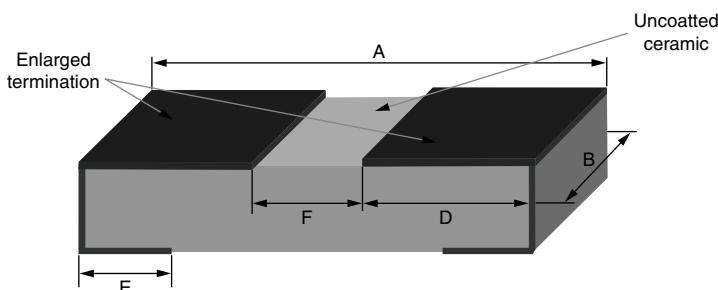

### Option: Enlarged terminations

For stringent and special power dissipation requirements, the thermal resistance between the resistive layer and the solder joint can be reduced using enlarged terminations chip resistors which are soldered on large and thick copper pads acting as heatsink (see application note: 53048 Power Dissipation in High Precision Vishay Sfernice Chip Resistors and Arrays (P Thin Film, PRA Arrays, CHP Thick Film) [www.vishay.com/doc?53048](http://www.vishay.com/doc?53048).

Option to order 0063: (applies to size 1206/1505/2010).
